

Bibliography of Political Science, 1886 Volume 1

Filesize: 2.89 MB

Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, alter the way I believe.

(Prof. Loyce Runolfsson Jr.)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 118 pages. Original publisher: Blacksburg, Va. : Virginia Polytechnic Institute and State University, Dept. of Aerospace and Ocean Engineering ; Washington, D. C. : National Aeronautics and Space Administration, 1990 OCLC Number: (OCoLC)68216157 Subject: Space vehicles. Excerpt: . . . 1990 LOCOST Senior Design Project Vehicle Configuration This section describes the overall LOCOST vehicle configuration. It also presents a design rationale, a short description of the configuration evolution, and a configuration component summary. Design Rationale The design of an aerospace vehicle must consider the traditional design criteria. Special features of a vehicle merit additional study. Traditional design criteria are listed below. Low mass Low moments of inertia Simplicity in design Ease of integration of configuration components Efficiency in execution of mission Reliability The above criteria must be balanced by a vehicles special needs. For example, a technologically advanced propulsion system can increase the vehicle mass and increase the complexity of design. These concerns are balanced by the increase in overall performance of the vehicle. The advanced propulsion system could also reduce overall propellant consumption making the previous objections moot. Such is the case with the LOCOST vehicle. The components of the vehicle which will provide the greatest design challenge are also the components which bend the traditional design criteria. Because the final design will contain both a laser propulsion device and a chemical propulsion device, several issues arise. These issues are summarized in Table 2. Table 2. Important Design Issues for the LOCOST Vehicle Placement of the laser engines Placement of the chemical engines Elimination of the interference between the two systems Collection of the laser beam for rocket use Line of thrust through the center of mass Placement of the cargo Placement of the fuel tanks Overall...
